

Hands-on UI / UX Experiments.

a) Fundamentals of UI and UX

i) what is UI?

UI - User Interface

It focuses on the visual and interactive element of a product.

- * Buttons, icons, typography, colors.
- * Layout and Spacing
- * Visual consistency
- * Responsive design.

The ultimate goal - Make the interface attractive and easy to interact with.

ii) what is UX?

UX - User Experience.

It focuses on the overall experience of the user while using the product.

- * User Journey
- * User satisfaction
- * Usability and accessibility
- * Performance and Efficiency.

iii) Key Principles of UI/UX

- * Simplicity
- * Consistency
- * Accessibility
- * Feedback (e.g. loading, error message)
- * User-centered design.

b) Difference between UI and UX (Real world case-study)

Case Study 1: Instagram

UI: clean layout, icons, smooth animations

UX: Easy scrolling, fast content loading, intuitive navigation

result: Highly engaging User experience.

Case Study 2: Uber

UI: Map interface, simple booking button.

UX: Quick ride booking, real-time tracking, clear pricing.

Result: Seamless transportation experience.

Case Study 3: Amazon

UI: Product Images, filters, clear layout.

UX: Easy search, fast checkout, recommendation.

Result: Efficient shopping experience.

Key Difference:

UI	UX
Visual Design	User Journey
look & feel	Usability & experience
colors, buttons	Flow, interaction
Front-end appearance	Overall satisfaction.

c) Illustrate the Relationship between UI and UX Design.

* UI and UX are closely related and interdependent components of product design

* They work together to create a system that is both visually appealing and easy to use.

Relationship.

UI focuses on presentation and interaction.

→ It defines how the system looks through colors, buttons, typography and layout.

UX focuses on structure and functionality

→ It defines how the system works, how to interact, and ensure a user smooth journey.

- * UI is built on top of UX
- * UX comes first, UI enhances it.

Workflow process.

UX Design Stage

- * Understand User needs.
- * Create User flow
- * Design wireframes

UI Design Stage.

- * Apply colors fonts and styles.
- * Design interactive elements.
- * Improve Visual appeal.

Final Outcome.

A product that is easy to use (UX)
Visually attractive (UI)

Example. Amazon.

UX — Easy Navigation
— simple checkout process

UI — clean layout
— Attractive product display.

Together They provide Smooth
Shopping experience.

Flow

User Requirements

UX Design

UI Design

Final product.

Adobe XD.

* It is a powerful tool for UI design and interactive Prototyping.

Key Feature: Create Animations and transitions

Voice prototyping support.

Repeat grid for fast design.

Advantages: Smooth performance
Professional level designs
Ideal for interactive prototypes.

Use case: High-quality app and web design.

Sketch.

* It is a Vector-based UI design tool mainly used on macOS.

Key Features: Symbols (reusable UI elements)
Plugin ecosystem
Artboards for multiple Screens.

Advantages: Lightweight & fast
Strong UI Design.

Use case: Interface design for iOS and web apps.

d) Demonstrate Various UI/UX Design Tools in Detail.

- * UI/UX Design tools help designers plan, design, prototype and test User Interface and User experiences efficiently.

- * These tools provide/improve productivity, collaboration and design quality.

Figma.

- * It is a cloud-based UI/UX design tool widely used in the industry.

Key Features:

- Real-time collaboration
- Works in browser
- wireframing and prototyping
- Reusable components and design systems.

Advantages:

- Easy to learn
- Best for teamwork.
- Free plan available.

Use Case: Designing mobile apps, websites, dashboards.

Invision.

* It is a prototyping and collaborative platform.

Key Features: clickable prototype

Realtime feedback and comments

Design sharing with teams

Advantages: Improves team communication

Easy client feedback.

Use Case: Presenting & testing designs

Canva.

* It is simple drag and drop design tool suitable for beginners.

Key Features: Ready made templates

Easy Interface

Quick design creation.

Presentation: No design experience needed
Fast and User friendly.

Use Case: Basic UI mockups, presentation.
